

Comfort, dexterity and great value, a winning formula

The Matrix[®] Mechanics from Polyco is a flexible, close fitting mechanics style glove. It is reinforced in key areas giving the user additional protection and has three open fingers for greater dexterity when handling components and tools.

This versatile glove features a synthetic leather palm with reinforced palm grip patches, spandex on the back of the hand for comfort, and Neoprene[®] on the knuckles for extra protection. This, combined with the reinforced liner, offers good overall protection while maintaining excellent levels of comfort and flexibility. The glove also has an adjustable velcro wrist strap for a secure fit. Amazingly, with the combination of features this glove offers exceptional value for money. Also available on header card for display purposes and allowing for lower order quantities.
